FOR IMMEDIATE RELEASE:

Codejock Releases v13.3.0 for Visual C++ and ActiveX

This is a maintenance release that introduces many stability and usability enhancements for all components for Windows 7 and x64 platforms. Additionally, a new Track Control for video editing is included, all ActiveX products are now x64 compatible, merged cell support for the report control and support has been added for Visual Studio 2010 RC.

MORRICE, Michigan, February 28, 2010 – Codejock Software, a leading provider of modern user interface components, today announced the release of Toolkit Pro 2009 v13.3.0 for Visual C++ MFC and Suite Pro 2009 v13.3.0 for ActiveX COM. This release provides a comprehensive set of fully customizable user interface components for use with Visual C++ MFC and ActiveX COM development.

Some highlights from this release include:

New Track Control: The all new Track Control can be used for tasks such as editing video clips or music. The track has movable blocks and keys, time position indicator, scrolling and zooming features.

ActiveX x64 Support: All ActiveX products now come with a 64-bit compatible OCX. With 64-bit support, projects can now be built using x64 configurations.

Report Control Merged Cell Support: Cells can now be combined vertically or horizontally.

Many x64 and Windows 7 Enhancements: All products have received many enhancements for Windows 7 and x64 platforms.

Visual Studio 2010 RC Support: Added support for the latest Visual Studio 2010 RC including a new VS 2010 option in the deployment wizard.

A complete list of all new features can be found in the release notes for each product located on the company's website, www.codejock.com.
