Codejock Software Wins Prestigious Productivity Award

OWOSSO, Michigan, March 21, 2005 – Codejock Software, a leading provider of Graphical User Interface (GUI) components and development tools, announced today that the company received *Software Development* magazine's 15th Annual Jolt Product Excellence and Productivity Award.

Codejock Software was honored as a Productivity Winner in the Libraries, Frameworks and Components category for their Xtreme Toolkit 9.51 Professional Edition product. The award was presented at the SD West 2005 Conference & Exposition held at the Santa Clara Convention Center in California's Silicon Valley.

"It is a privilege to have not only been selected as a Jolt finalist, but to have won the productivity award as well. It is quite an honor to have achieved the national and international recognition that comes with this award and to be recognized for the continuing hard work and many talents of our product development team." said President and CEO Kirk Stowell who was present to accept the award on behalf of Codejock Software.

For the past 15 years, *Software Development* magazine's Jolt Product Excellence and Productivity Awards have been presented annually to products, books and websites that have 'jolted' the industry by helping to create faster, easier and more efficient software. Jolt cola, the fabled soft drink used by software developers for sustenance during development projects, sponsors the awards presentation. Entries are judged for innovation and market leadership. A list of finalists are selected and reviewed by a panel of judges from the US, Canada, and France.

About Codejock Software

Codejock Software is a division of Codejock Technologies, LLC, based in Owosso, Michigan. The company provides thousands of corporate customers worldwide with reusable software components for Visual C++ and Visual Studio .NET® development platforms that facilitate rapid Graphical User Interface (GUI) development. Codejock Software is considered a leading component provider, and is committed to helping developers realize their goals by providing superior customer service and technical support in addition to their already top notch components. Codejock Software's products and evaluation versions for the products are now available for download on the company's website.
